DUONG DAI CHAU

Field Engineering · Project Engineering · Construction Management

Lawrenceville, GA (470) 855-0900 dchau38@gatech.edu linkedin.com/in/chaudaiduong0412
chaudaiduong0412.github.io

SUMMARY

Construction management graduate student at Georgia Tech with one year as superintendent and project engineer on a two-tower high-rise façade package and a summer as a general-contractor field engineer. On site I ran RFIs and submittals, reviewed shop drawings, coordinated installation crews and inspected installed work. A structural and foundation design background lets me read what the drawings ask of the field. Seeking a Spring 2027 part-time co-op and a Summer 2027 internship in field or project engineering in metro Atlanta. Eligible to work under CPT; no sponsorship required.

CONSTRUCTION EXPERIENCE

Superintendent / Project Engineer · BM Windows JSC Jun 2023 – Jan 2024
Zeit River Thu Thiem · door, window and glazing package on two residential towers (34 and 27 storeys) for GS E&C Ho Chi Minh City, Vietnam

- Coordinated trade contractors and installation crews across both towers on an active high-rise site.
- Inspected installed units for quality and dimensional accuracy against the approved shop drawings.
- Processed RFIs, material submittals and method statements between the GC, design consultants and suppliers.
- Produced and reviewed AutoCAD shop and fabrication drawings for four zones (A–D) and seven door and window systems, each issued in 1-colour and 2-colour versions; carried sets through review to approval, up to Rev.03.
- Held the fabrication, delivery and installation schedule against project milestones.
- Performed wind-load, deflection, anchorage and constructability checks against the project specifications.

Field Engineer Intern · Newtecons Construction Jun 2022 – Aug 2022
Flora Mizuki MP9 & MPX · high-rise residential; general-contractor scope covering foundation, structure, finishing, MEP and landscape Ho Chi Minh City, Vietnam

- Checked setting-out and dimensional accuracy against the issued-for-construction drawings.
- Monitored progress, quality control and safety compliance; recorded daily progress and site conditions for site management.
- Prepared quantity take-offs and cost estimates for procurement and planning.

ENGINEERING PROJECTS

Tan Thinh Loi Apartment · B.S. capstone, structural and foundation design May 2023

- Designed a 14-storey reinforced concrete building with a basement to Eurocodes 2 and 7: typical slab, frame from basement to Story 14, staircase and a 7.1 m-span rooftop water tank.
- Compared two foundation options through the same checks: D1200 bored piles to -60 m and D900 spun piles in three 18 m segments to -60.9 m, below 32 m of soft clay.
- Checked pile capacity, group stability, settlement and pile-cap flexure and punching shear; produced a 12-sheet construction drawing set and a 101-page foundation report.

Shaft-grouted bored piles · co-author, Journal of Materials & Construction (JOMC) Oct 2021 – Mar 2022

- Load-transfer (t–z) analysis of shaft-grouted bored piles, validated against full-scale static load tests at Friendship Tower, Ho Chi Minh City (test loads to 3,150 t).
- Predicted 9.6 mm settlement at design load against 10 mm measured; the paper estimates grouting raised ultimate capacity about 1.7–2 times.

EDUCATION

Georgia Institute of Technology · M.Eng. Civil Engineering, Construction Management Jan 2026 – Dec 2027 (expected)

GPA 4.00 / 4.00 · Atlanta, GA

- Coursework: Construction Project Control; Advanced Planning & Cost Estimation; Construction Law; Building Information Modeling.

DeVry University, Keller Graduate School of Management · MBA Jan 2025 – Dec 2025

GPA 4.00 / 4.00 · Operations, finance and quantitative risk analysis

Southern Illinois University Edwardsville · M.Eng., Engineering / Industrial Management Jan 2024 – Jan 2025

GPA 3.83 / 4.00 · Process optimization and systems analysis

Ho Chi Minh City University of Technology (HCMUT) · B.S. Civil Engineering Sep 2019 – Nov 2023

GPA 3.10 / 4.00 · Structural & Foundation Engineering track · Outstanding Academic Performance (2021–2022); OISP Scholarship (2020–2021)

RESEARCH EXPERIENCE

Graduate Research Assistant · Georgia Institute of Technology Jan 2026 – Present

Advisor: Prof. Yichang (James) Tsai · Sponsor: Georgia DOT

- RP 24-12, economic analysis of RCUT access impacts: co-author of the GDOT final report (FHWA-GA-26-2412, approved September 2026); built the Excel screening tool that ranks 18 factors across 7 categories.
- Curve Finder, GT-SECURE lab: leading a student team on horizontal curve detection in Python and MATLAB.

Volunteer Researcher · AutoRob Lab, School of Building Construction Fall 2026 – Present

VR environments for construction safety training and hazard recognition · PI: Dr. Omobolanle (Bola) Ogunseiju

SKILLS

Field operations	Trade and crew coordination, field inspection, QA/QC, setting-out and dimensional checks, daily reports, safety compliance
Project controls	RFIs, submittals, method statements, quantity take-off, cost estimating, schedule coordination
Drawings & VDC	AutoCAD, Revit, Bluebeam Revu, shop and fabrication drawing review, BIM coordination
Engineering	ETABS, SAP2000, reinforced concrete design, pile and foundation design
Data	Excel (advanced), Python, MATLAB, ArcGIS
Languages	English (professional), Vietnamese (native)
Work authorization	F-1 student, eligible for CPT; no sponsorship required for co-op or internship

Project case studies, drawings and the RP 24-12 final report: chaudaiduong0412.github.io
